

1878 W White Mountain Blvd

Lakeside, AZ 85929

Levelized Billing (Budget) Terms and Conditions

- Member must be at current location for 12 consecutive months before being allowed to join the Levelized Billing Program.
- Levelized bill amount is based off of the prior 12 month consumption history usage.
- Fixed Levelized Billing Program monthly bill amount is reviewed and will recalculate twice a year (February and August) based off of the prior 12 month consumption history usage.
- Variable Levelized Billing Program monthly bill amount is recalculated every month based off of prior 12 month consumption history usage.
- Levelized bill amount must be paid by due date. Member will be removed from the Levelized Billing Program if account becomes delinquent three (3) or more times in a 12 month period, and the member will not be allowed to participate in the Levelized Billing Program for one year.
- Levelized bill may not be overpaid (no credits will be issued). If the bill amount is overpaid, the next month's bill will still have the set bill amount due, not the reduced amount due to overpayment (credit will not be applied).
- Member's monthly billing statement will include a "Levelized Program Status" that reflects their settlement amount as of their statement date. In the event that the member discontinues their service at this location, or if the member chooses to no longer participate in NEC's Levelized Billing Program, the settlement amount is the amount that NEC would owe the member, or the member would owe NEC, less any charges that have occurred since the last billing statement was issued.
- If our member plans on adding or removing an electric load at their location, the member needs to contact NEC's Member Care so that the Levelized Amount Due may be reevaluated (i.e. changing to an electrical heat source, installing solar panels, installing an ETS heater, etc.).
